Contents of Volume 32

No. 1. *January 1952*

Intrapulmonary Distribution of Inspired Gas	*Ward S. Fowler*	1
'Paralytic Secretion' of Saliva: An Example of Supersensitivity After Denervation	*N. Emmelin*	21
Histamine in Blood	*Charles F. Code*	47
Cobalt, Copper and Molybdenum in the Nutrition of Animals and Plants	*Hedley R. Marston*	66

No. 2. *April 1952*

Water Exchanges and Barriers as Studied by the Use of Hydrogen Isotopes	*Ernest A. Pinson*	123
Water Metabolism of Desert Mammals	*Knut Schmidt-Nielsen and Bodil Schmidt-Nielsen*	135
Chemistry of Phosphatides and Cerebrosides	*Walter D. Celmer and Herbert E. Carter*	167
Folic Acid Antagonists	*Harold G. Petering*	197
Physiological and Pharmacological Characteristics of Liquid Aerosols	*L. Dautrebande*	214

No. 3. *July 1952*

Parabiosis in Physiological Studies	*John C. Finerty*	277
Purine and Pyrimidine Metabolism	*Adam A. Christman*	303
Flicker Fusion Frequency: Background and Applications	*Ernst Simonson and Josef Brožek*	349

No. 4. *October 1952*

Effect of Hormones on Lymphatic Tissue	*Thomas F. Dougherty*	379
Cell Genetics and Hereditary Symbiosis	*Joshua Lederberg*	403
Biochemical Evidence of Nutritional Status	*Oliver H. Lowry*	431
Fundamental Stimulus for Erythropoiesis	*Wilson C. Grant and Walter S. Root*	449
Rate Behavior of Metabolic Systems	*John Z. Hearon*	499
